

# TwinMarket Deep Analysis Report

matplotlib is not installed, so this fallback PDF summarizes the five required sections as tables.

## 1. Agent Turnover vs Final Return

| agent | traded_value  | fills | final_return_% | depth |
|-------|---------------|-------|----------------|-------|
| A097  | 2,149,142,000 | 12    | 29.50          | 2     |
| A071  | 1,869,176,000 | 13    | 22.62          | 2     |
| A087  | 1,541,100,000 | 13    | 24.86          | 2     |
| A082  | 1,242,204,100 | 9     | 16.37          | 2     |
| A043  | 1,139,619,500 | 9     | 39.73          | 1     |
| A056  | 1,092,810,000 | 10    | 17.62          | 2     |
| A039  | 1,036,403,500 | 9     | 39.54          | 1     |
| A080  | 941,120,500   | 11    | 15.77          | 2     |
| A052  | 731,697,500   | 8     | 9.60           | 1     |
| A100  | 245,310,000   | 15    | 28.76          | 2     |

## 2. Order Price Deviation & Fill Range

| metric       | value |
|--------------|-------|
| buy_orders   | 862   |
| sell_orders  | 338   |
| total_orders | 1200  |

## 3. Disposition Effect

| agent | final_return_% |
|-------|----------------|
| A093  | 47.36          |
| A075  | 47.35          |
| A043  | 39.73          |
| A039  | 39.54          |
| A058  | 39.38          |
| A040  | 38.84          |
| A098  | 38.63          |
| A079  | 36.62          |
| A023  | 36.08          |
| A047  | 35.54          |

## 4. Volatility & Volume Clustering

| metric          | value  |
|-----------------|--------|
| volatility_corr | 0.0236 |
| volume_corr     | 0.2714 |

## 5. Trading Inequality

| metric            | value  |
|-------------------|--------|
| agent_count       | 50     |
| gini_traded_value | 0.5997 |
